**“When Swiss Isn’t the Answer: Game-Changing Turning Platforms”  
Is Absolute Machine Tools Tech Talk at PMTS Booth #3050**

[LORAIN, OH – JANUARY 2019] “When Swiss isn’t the Answer: Game-Changing Turning Platforms” is the subject of a PMTS 2019 Tech Talk presented by Absolute Machine Tools 10:30 – 11:00 a.m. on Wednesday, April 3, 2019, in [booth 3050 at PMTS 2019](#).

Greg Knight, Vice President of Sales – Production Turning Products Division and Phillip Judt, Applications Engineer – Production Turning Products Division, will outline the evolution of the [screw machine](#) industry and its progress from manual to cam machines, Swiss-type equipment and high-tech multi-spindle screw machines.

As alternatives to these viable but increasingly expensive options, the presenters will describe more efficient and cost-effective methods, including advancements in CNC multi-slide and live tool [mill/turn machines](#).

The presenters will explain how processes performed on multi and single-spindle screw machine and [CNC Swiss-type lathes](#) can be done more efficiently and economically on B-axis mill/turn centers and multi-slide single spindle machines. The CNC machine tools present multiple tools to the cut for improved cycle times, provide the ability to hold the tightest tolerances and flawless finishes, and enable completed parts to be dropped a single operation.

For more information, visit PMTS 2019 booth 3050, browse [www.absolutemachine.com](http://www.absolutemachine.com), or call 800-852-7825.
