With Art: LICO LNDD Series Mill/Turn Center

**Absolute Machine Tools Demonstrates LICO LND-65D-S3
11-Axis Mill/Turn Center in Booth 3050 at PMTS 2019**

[LORAIN, OH – January 2019] In [Booth 3050 at PMTS 2019](#), Absolute Machine Tools will demonstrate the LND-65D-S3 11-Axis [mill/turn center](#). With up to 5 tools in the cut simultaneously, the machine can produce parts faster than conventional twin spindle, multi-turret machines.

The LND-65D-S3 has a bar capacity of 65mm (2.56"), maximum turning length of 475mm (18.7"), and employs independent 2-axis cross slides that can overlap each other and the turret. An 8-position turret with optional live tooling and Y-axis is standard. The turret works on either the main or the counter spindle, and can perform on-center work on both spindles simultaneously. The 27 hp, 4,000 rpm main spindle is complemented by a 9.4 hp, 5,000 rpm counter spindle. With live tooling on the turret (up to 16 live tools) the LND-65D-S3 changes from a turning center to a machine that can handle cross drilling, tapping, slotting, and basic milling.

The [LNDD machines](#) are available in 42mm, 51mm, 65mm, 80mm and 100mm bar capacities. The LNDD platform comes standard with an independent counter spindle, dual high-pressure oil pumps, chip and part conveyors and tool holders for all positions. The LNDD machines are built with a highly engineered frame and slides for dampening vibration and reducing size and finish variables resulting from such vibration. The result is a stable process at cycle times that are often 2 to 3 times faster than twin spindle, single turret machines.

About Absolute Machine Tools, Inc.

Absolute Machine Tools, Inc. sells and supports Johnford Bridge & Gantry Mills; You Ji Vertical Turret Lathes; Tongtai Horizontal Machining Centers (former Hitachi-Seiki OEM); Quicktech Multi-Axis Multi-Spindle Mill/Turn Centers; Lico Multi-Slide CNC Screw Machines and Twin Spindle Multi-Slide Mill/Turn Centers; Nexturn Swiss-type Lathes; AccuteX Wire EDM and Die Sinker Machines; APEC 5-axis Gantry-style Linear Motor Machining Centers; and Precihole Gundrilling Machines. The company has worked with several of its principal machine tool partners for over 25 years to offer some of the most heavy-duty, accurate, and productive machines in the industry. The company has built its reputation on exemplary applications engineering, service, customer support, comprehensive training, and effective preventive-maintenance programs. In addition to its headquarters in Lorain, Ohio, the company has established direct full-service technical centers in Mason, Ohio; Elgin, Illinois; and Livonia, Michigan. For more information, contact Absolute Machine Tools, Inc. at 800-852-7825 or www.absolutemachine.com.
